**Original door,
installed circa
1812**

**Maiman 60-minute
fire-rated replacement
door, installed 1997**

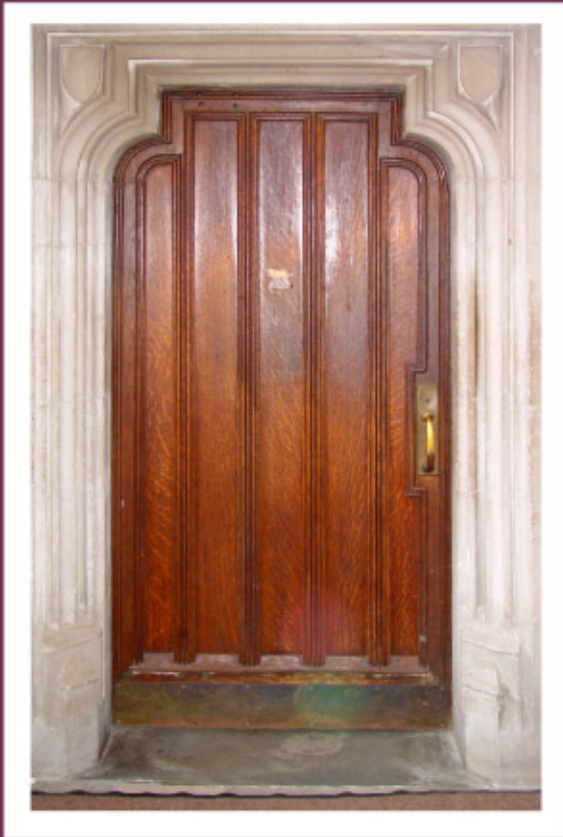

Crafting the Classics of Tomorrow

The Eisenhower Old Executive Office Building in Washington, D.C. is one of the most important and historic American governmental buildings, housing the offices of many political leaders since 1812. But by 1997, its doors were in need of replacement.

Maiman was the only company who could duplicate the timeless beauty of these classic doors' craftsmanship while still adhering to a 60-minute fire-rating requirement.

If Maiman has the ability to duplicate the quality of a door of this importance, just imagine what we can do for your project!

Maiman Historic Replications

Madison Hall, Princeton University: The original historic doors in this dining hall, erected in 1916, were handmade by master craftsmen and tailored to highly irregular shapes and dimensions. Duplicating such doors is a daunting task, but Maiman's experienced engineers and craftsmen were able to do just that, creating eight doors that not only matched the beauty of the originals, but also fulfilled modern fire code requirements.

The Maiman Company gives you the opportunity to reproduce classic doors for restoration or renovation purposes and still meet modern code requirements. No matter how irregular the opening shape or door design is, Maiman can duplicate it using our usual high-quality materials and exacting craftsmanship.
