

Quality Wood Jambs

ASSA ABLOY

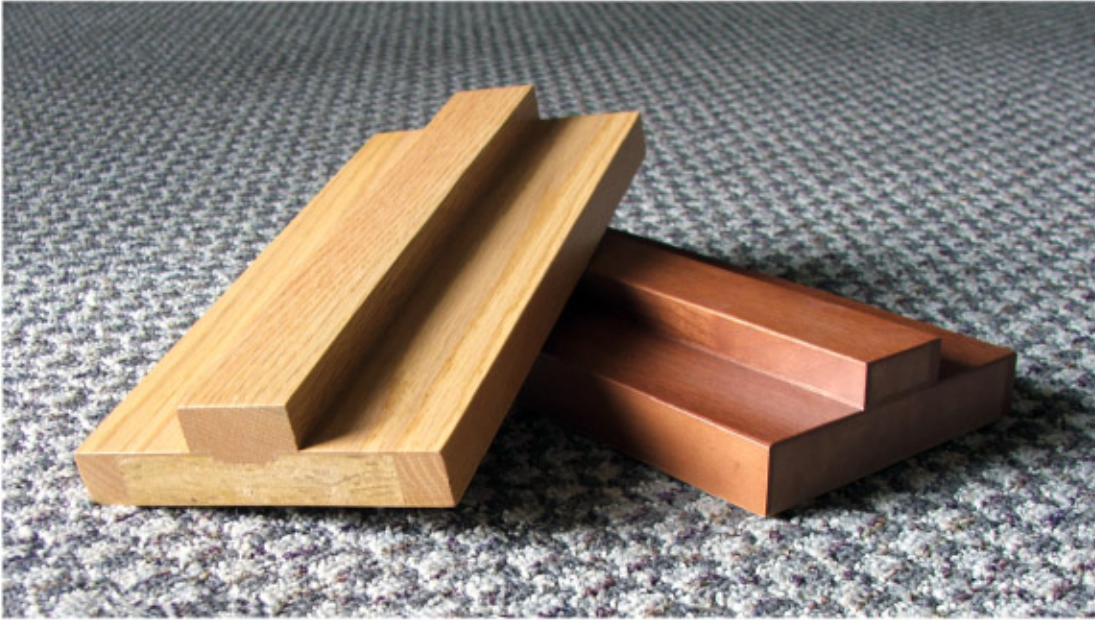

Quality Doors, quality Frames

THE MAIMAN COMPANY offers a complete line of non-rated and fire-rated wood frames to complement our doors. Choose a non-rated, 20-minute, or a 45/60/90 minute fire-rated door frame (positive or neutral pressure) for your project needs.

Like our doors, the non-rated and fire-rated door frames have the same aesthetic appearance. You can also select your door jambs to match your door species or to provide contrast.

Maiman Quality Wood Jambs

Maiman jamb cross-sections in 20-minute fire-rating (left), and 90-minute fire-rating (right)

THE MAIMAN COMPANY has introduced a number of positive pressure fire-rated wood doors in the past few years. We are also testing and designing more product lines to qualify for this rating. For example, we now offer Thermal Fused flush wood doors in 20-90-minute fire ratings.

Like our doors, the non-rated and fire-rated door frames are available in a wide variety of faces and wood species.

Please note when ordering jambs with fire-rated doors, the jamb fire rating must meet or exceed the door's fire rating.

We offer both flat jambs and rabbeted jambs. However, we highly recommend flat jambs for better internal stability and superior veneer face materials.

Visit our website at www.maiman.com for more information or to request a sample.

Flat Jamb Products Highlights:

- Field applied door stop. Shipped long, loose, and unmitered
- Veneered construction (except paint grade poplar)
- May be used for sidelights and/or transoms
- Standard jamb thickness:
 - 13/16" (non-rated & 20 minute)
 - 1" (45/60/90 minute fire-rated)
- Standard door stop size: 5/8" x 1 1/2"
